

## **COVID Protocols**

- We ask that if you are feeling ill or are symptomatic, please stay home! While we love to see you, your recovery and community care both come first.
- Well-fitted respirator masks (KF94, KN95, N95, or better) are highly recommended and encouraged, though not a requirement. We will continue to make respirator masks available to all comers, and we will also supply COVID home tests while supplies last.
- Air purifiers will be installed in the pulpit and choir areas.
